Simulated Tile Skirt for Bathtubs  
Manufactured in one piece durable  
Acrylic sheet and backed with fiberglass

Acrylic Skirts available for most corner tubs and  
Rectangular decked tubs with access panels  
attached with commercial Velcro to grant access  
to the underside of the tub and motor.

*Simulated Tile Shower Wall Panel System*

These panels are made of cast acrylic backed with ABS in order to give you a beautiful gloss look, and extreme toughness. They come in panels that can be cut to various dimensions in order to fit all of our shower pans and most bathtubs. The tile is 6" x 6" so when it is cut your tile will be able to be cut along an existing grout line, which will keep your tile looking even from one side to the other.

The panels are available in 48" x 84" and 60" x 84". Great around our walk-in tubs, shower walls and bathtubs. These are by far the cheapest surrounds you can install. All materials are Anti-Microbial and are very easy to clean, which means there are no grouts lines to ever worry about changing color or any chance of bacteria growth.
